

English

Reading

We will be reading a range of books linked to our topic that will be available in the topic box in the reading corner in class. These books are available for children to access during guided reading sessions, and wet playtimes.

Instructions

We will be focusing on instructions and recipes, looking at their key features and developing a recipe of our own as well.

Narrative

We will be focusing on developing settings.

Art/DT

As mentioned in the computing section, we will be creating our own company logos, designing and making the packaging for the pizzas we design.

P.E

Taekwondo

We will be learning some of the basic taekwondo moves. These will all be based on the sporting aspect of taekwondo or self defence. There will also be a focus on the tenants of taekwondo too. These are etiquette, modesty, perseverance, self control and an indomitable spirit.

Science

We will be learning about properties of materials and how they change.

For example, we will be looking at solids, liquids and gases and how they are made up, as well as the differences between dissolved and mixed solutions. We will be focussing on yeast, its properties and baking too.

Year 5
Spring 2 2017
Topic: Bake it

Maths

Fractions

Initially we will be focusing on fractions and finishing off our fractions element of Maths No Problem. This will include looking at how to multiply fractions by whole numbers.

Decimals

Once we have completed our fractions unit our main focus will be decimals. We will be learning to compare and order decimals, add and subtract them and how to round.

Measurements

It wouldn't be a baking topic if we didn't include measurements and conversions. These are Maths lessons but will take place in the afternoon to help us understand our topic better.

Music

We will be creating small jingles to advertise our products if we were wanting to advertise them on the radio. The children will need to think of any appropriate music they would like to add and create a jingle that people will remember. This will then be put together

International/Geography

As part of this topic we will be looking at lives of children and people in different countries and comparing them to our own. The children will be asked to research food from a different culture and feed back this information to the class in any form they want—even by bringing food in for us to taste test if they want to!

R.E

We are going to be looking at Easter, and learning about the Easter story. We will be trying to understand the influence of Christianity on our current day Easter celebrations.

Computing

As part of our topic this half term we will be creating a company logo and packaging for the pizza that we design. We will be using a variety of different apps and programmes to do this, with the aim of printing them out to share.
